Gross Profit By Region

- ▶ Domestic business profit increased while overseas business profit declined, resulting in an overall decrease in profit
- ▶ Increase in domestic business sales, mainly due to higher sales of cosmetic materials and formulated epoxy resins
- ▶ Despite higher profits overseas due to the weaker yen, profits decreased due to sluggish resin sales stemming from the impact of the economic slowdown

Domestic & Overseas Gross profit(100 millions of yen)

Overseas gross profit By Region(100 millions of yen)

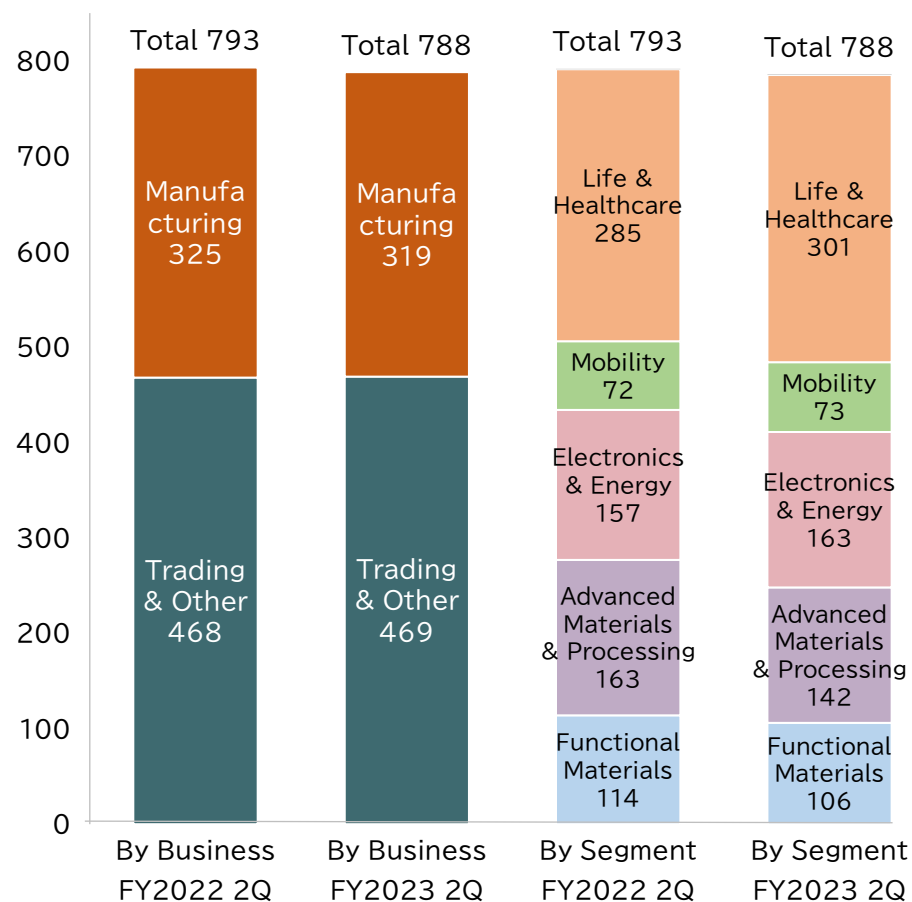

※Domestic figures under Domestic & Overseas Gross Profit include inter-regional adjustments

Gross Profit By Business & Segment

- ▶ Functional Materials posted lower sales of coating raw materials and raw materials for semiconductor-related products and other electronics industry products
- ▶ Advanced Materials & Processing posted lower sales due to decreased demand for resin sales in the office equipment, appliance, and video game device market, as well as the impact of inventory adjustments by customers
- ▶ Despite a decrease in raw materials sales for semiconductor-related products in Electronics & Energy, profits rose overall with an increase in sales of formulated epoxy resins for semiconductor- and electronics-related products
- ▶ Sales of Life & Healthcare-related cosmetic material and pharmaceutical raw materials increased

Gross Profit By Business & Segment (100 millions of yen)

Change in Gross Profit By Segment (100 millions of yen)

History of Gross Profit(100 millions of yen)

Operating Income by Business & Segment

- ▶ Functional Materials and Advanced Materials & Processing posted lower operating income due to a decrease in gross profit
- ▶ Electronics & Energy posted higher operating income with increased gross profit
- ▶ Life & Healthcare recorded higher gross profit; however, weaker profitability at the Prinova Group, increased personnel expense, other selling, general and administrative expenses, and a delay in the profit contribution of the new Utah plant caused a decrease in operating income
- ▶ We continue to invest for sustainable future growth, including in DX-related areas

Operating Income by Business & Segment(100 millions of yen)

Change in Operating Income By Segment (100 millions of yen)

History of Operating Income(100 millions of yen)

Functional Materials Segment Operating Income Overview

- ▶ Decrease in sales of coating raw materials to the automotive and other industries
- ▶ Sales decreased for raw materials for semiconductor-related products and other electronics industry products, as did sales of raw materials for industrial oil solutions and plastic materials
- ▶ Lower profit year on year as a result of overall weak performance due in part to customer inventory adjustments

Operating income by business(100 millions of yen)

History of operating income (100 millions of yen)

Advanced Materials & Processing Segment Operating Income Overview

- ▶ Lower profit due to decreased demand for resin sales in the office equipment, appliance, and video game device market, as well as the impact of inventory adjustments by customers
- ▶ Lower digital print processing materials sales due to lower profitability in the manufacturing business
- ▶ Decrease in resin sales and lower profitability in the manufacturing business led to weak performance in trading company and manufacturing businesses and lower profit year on year

Operating income by business(100 millions of yen)

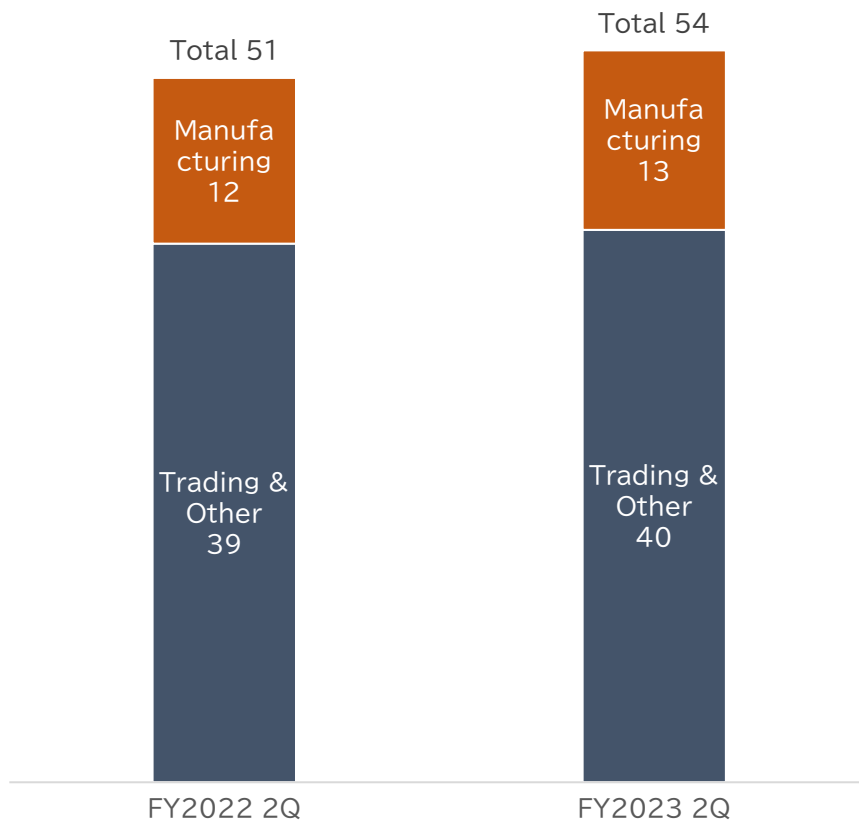

History of operating income (100 millions of yen)

Electronics & Energy Segment Operating Income Overview

- ▶ Despite weakening semiconductor market conditions, sales of materials to the semiconductor industry increased due to growth in product sales
- ▶ Sales of formulated epoxy resins increased mainly for server applications and mobile device applications
- ▶ Profit rose overall year on year with strong sales of formulated epoxy resins

Operating income by business(100 millions of yen)

History of operating income (100 millions of yen)

Mobility Segment Operating Income Overview

- ▶ Sales increased for resins, mainly due to an increase in automobile production and expanded market share to existing customers
- ▶ Sales increased in functional materials and functional components for interior and exterior fittings and electrification
- ▶ Operating income decreased year on year due to an increase in selling, general and administrative expenses associated with higher activity volume, etc.

Operating income by business(100 millions of yen)

History of operating income (100 millions of yen)

Life & Healthcare Segment Operating Income Overview

- ▶ Overall, the Prinova Group recorded higher sales due to the impact of the weaker yen and operations at the new plant in Utah; however, food ingredient sales profitability declined due to falling market prices
- ▶ Hayashibara posted increased sales, mainly in cosmetic material
- ▶ Despite strong performance at Hayashibara, profit decreased overall year on year due to weaker in the Prinova Group and a delay in the profit contribution of the new Utah plant

Operating income by business(100 millions of yen)

History of operating income (100 millions of yen)

State of Major Manufacturing Subsidiaries

- ▶ Nagase ChemteX : Despite the transfer of the biochemicals business, profit rose due to increased sales of highly profitable formulated epoxy resins
- ▶ Hayashibara : Higher profit due to the wider advancement of price increases and strong sales of cosmetic material stemming from a recovery in demand
- ▶ Prinova Group : Despite increased sales in our manufacturing and processing business, profit declined due to the impact of weaker profitability in food ingredient sales stemming from deteriorating market conditions, increased personnel expense and other selling, general and administrative expenses, and a delay in the profit contribution of the new Utah plant

FY2023 Earnings Projection(Changed)

- ▶ While certain businesses, such as the automobile-related, semiconductor-related, and Life & Healthcare have been performing solidly, we lowered our full-year earnings forecast in light of the following conditions
- ▶ Resin sales declined due to lower demand for electronic and electrical projects caused by global inflation; profitability declined due to falling market prices
- ▶ The food-related business experienced a delay in profit contribution of the Prinova Group's new Utah plant, while food ingredient sales profits declined due to falling market prices
- ▶ Smartphone demand has yet to see a full-fledged recovery in demand, which we expected to begin in the second half of the fiscal year; profits from sales of related materials and raw materials may be lower than initial forecast

FY2023 Earnings Projection By segment(Changed)

- ▶ Sales of Functional Materials should increase due to a transfer of business from the Advanced Materials & Processing segment; however, we revised our forecast for operating income downward due to the negative impact of the digital print processing business, which is experiencing a decline in profitability
 - ▶ While we expect sales in the Electronics & Energy business to decrease, the decline in gross profit should be minor due to the increase in sales of high-profit products; therefore, we made an upward revision in operating income
 - ▶ We made a downward revision in operating income due to the delayed contribution of Prinova Group's new plant in Utah, despite the strong performance of Hayashibara in the Life & Healthcare-related business
 - ▶ We reduced Corporate & Others after reviewing cost effectiveness
- *Figures for FY2023 prior to revision represent business segments before reclassification; FY2022 actual and FY2023 revised forecasts represent business segments after reclassification
