1. Qualitative Information

(1) Business Performance

a. General Summary of Results

The global economy for the current consolidated third quarter saw different situations for each country. While the economic impact of the COVID-19 pandemic remains serious, China maintained an economic recovery after resuming economic activity quickly in the wake of the pandemic. Economic activities resumed gradually in the Japanese economy since the second quarter, while consumer activities have also been recovering at a gradual pace. However, conditions continue to be unpredictable, as some economic activities have been curtailed due to the impact of the reemergence of COVID-19 infections. Among the regions where the NAGASE Group conducts business, Greater China has recovered to pre-pandemic levels. Japan and ASEAN have been tracing a gradual recovery, while economic activity remains sluggish in the Americas and Europe, and the future continues to be uncertain.

In this environment, the Company recorded domestic sales of \(\frac{\pmanux}{264.81}\) billion (-13.2% year on year) for the cumulative consolidated third quarter. Overseas sales amounted to \(\frac{\pmanux}{339.72}\) billion (+14.5%), reflecting the entire nine-month sales of the Prinova Group, which the Company acquired in the second quarter of the prior consolidated fiscal year. In total, the Company recorded net sales of \(\frac{\pmanux}{4604.54}\) billion (+0.5%).

The company recorded gross profit of \$83.71 billion (+7.6%) due to the contributions of the highly profitable Prinova Group. Despite rising costs related to our pursuit of digital transformation (DX) and other activities toward sustainable growth, operating income amounted to \$16.06 billion (+6.7%), mainly due to cost savings associated with voluntary constraints on activities caused by the COVID-19 pandemic. Ordinary income amounted to \$17.15 billion (+9.2%). Profit attributable to owners of the parent amounted to \$16.55 billion (+37.4%), mainly due to gain on sales related to the transfer of subsidiary stock and sales of cross-shareholdings.

b. Segment Summary

Functional Materials

The Functional Materials segment recorded lower sales in both domestic and overseas markets. This result was mainly due to lower automotive production in all regions (except Greater China) affected by the spread of the COVID-19 pandemic. This was particularly true for the first half of the year, despite a more recent trend in recovery.

The Performance Chemicals business recorded lower sales due to lower sales in coating raw materials and urethane materials as a result of lower automotive production.

The Speciality Chemicals business recorded lower sales overall, despite firm sales of electronics chemicals mainly for the semiconductor and other electronics industries, mainly due to the performance of industrial oil solutions and plastic materials, which were sharply impacted by the weak automotive industry.

As a result, sales for the segment amounted to ¥112.48 billion, representing a ¥17.43 billion (-13.4%) decrease compared to the same period in the prior fiscal year. Operating income fell ¥640 million (-15.7%) compared to the prior cumulative consolidated third quarter, amounting to ¥3.44 billion.

Advanced Materials & Processing

The Advanced Materials & Processing segment recorded lower sales in the domestic market due to the broad impact of the COVID-19 on the resins and other businesses. Although sales in Greater China increased due to the early resumption of economic activities, overall overseas sales decreased slightly due to a decline in sales in other regions.

The Colors & Advanced Processing business recorded lower sales overall, due to sharply decreased sales of digital print processing materials in Japan, the Americas, and Europe. Sales of dyes and additives, plastic resins for industrial and packaging applications, and conductive materials were also lower.

The Polymer Global Account business, which mainly sells plastics to the office equipment, appliance, and video game device markets, recorded lower sales overall. This result was mainly due to sales declines in Japan and ASEAN, despite an increase in

sales in Greater China.

As a result, sales for the segment amounted to ¥195.92 billion, representing a ¥11.42 billion (-5.5%) decrease compared to the same period in the prior fiscal year. Operating income declined ¥1.72 billion (-24.8%) compared to the previous cumulative consolidated third quarter to ¥5.23 billion, impacted primarily by weaker profitability due to declining market conditions in the digital print processing materials business.

Electronics

Despite increased sales of precision processing-related materials used in connection with intermediate processing in semiconductors and a slight increase in sales related to formulated epoxy resins used in heavy electrical and light electrical applications, the Electronics segment recorded slightly lower net sales overall, driven by lower sales of materials related to displays, photolithography, and equipment.

As a result, sales for the segment amounted to \(\frac{\text{\$\text{\$\text{\$\text{\$\text{\$46.01}}}}}{1000}\) billion, representing a \(\frac{\text{\$\}\$}}}\$}\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$\text{\$

Mobility & Energy

The Mobility Solutions business recorded lower sales both in Japan and overseas. This result was due to lower sales of car electronics-related products in Japan and lower sales in the resins business in all regions (except Greater China), stemming from lower automotive production (excluding Greater China) caused by the COVID-19 pandemic.

As a result, sales for the segment amounted to \$78.74 billion for the cumulative consolidated third quarter, representing a \$19.27 billion (-19.7%) decrease year on year. Operating income fell \$740 million (-47.8%) compared to the prior cumulative consolidated third quarter, amounting to \$810 million.

Life & Healthcare

The Life & Healthcare segment recorded significantly higher sales overall, due to higher sales overseas driven by the addition of sales from the Prinova Group acquired by the Company in the prior consolidated second quarter, though domestic sales decreased mainly due to lower demand attributable to the impact of the COVID-19 pandemic.

The new Food Ingredients business recorded significantly higher sales overall, boosted by the addition of sales from the Prinova Group despite reduced sales of TREHATM and other products in the food materials field in Japan and overseas.

The Life & Healthcare business recorded gains in sales of pharmaceutical raw materials and intermediates and medical materials in the medical and pharmaceutical field along with rising sales of hygiene products-related materials in the skin care and toiletries field. Overall sales were lower, however, as sales of AA2GTM in the skin care and toiletries field decreased in Japan and overseas. Pharmaceutical production business sales to the medical and pharmaceutical field also decreased due to the sale of a Company's manufacturing subsidiary.

As a result, sales for the segment amounted to ¥131.09 billion, which was a ¥52.37 billion (+66.5%) increase compared to the cumulative consolidated third quarter of the prior fiscal year. Operating income grew ¥2.51 billion (+95.8%) year on year, reaching ¥5.14 billion.

Other

No special matters to disclose.

(2) Financial Position

As of the end of the consolidated third quarter, current assets amounted to ¥388.63 billion. This represents an increase of ¥9.29 billion compared to the end of the prior consolidated fiscal year, mainly due to an increase in accounts receivable, which was offset in part by decreases in cash and deposits and inventories. Non-current assets amounted to ¥247.1 billion, up ¥14.96 billion from the end of the prior consolidated fiscal year. This increase was mainly due to an increase in investment in

securities stemming from a rise in the fair value of shares owned by the Company, offset in part by amortization of intangible fixed assets and a decrease in property, plant and equipment in connection with the exclusion of certain domestic subsidiaries from the scope of consolidation. As a result, total assets increased ¥24.26 billion compared to the end of the prior consolidated fiscal year to ¥635.73 billion.

Liabilities amounted to ¥298.15 billion, a decrease of ¥80 million compared to the end of the prior consolidated fiscal year. This result was mainly due to decreases in commercial paper and short-term loans, offset in part by an increase in accounts payable.

Net assets amounted to \(\frac{\pmax}{337.58}\) billion, up \(\frac{\pmax}{24.34}\) billion compared to the end of the prior consolidated fiscal year. This increase was mainly due to the recording of profit attributable to owners of the parent in the amount of \(\frac{\pmax}{16.55}\) billion, as well as an increase in net unrealized holding gain on securities.

As a result, the Company recorded a shareholders' equity ratio of 51.8%, up 1.9 points over the 49.9% at the end of the prior consolidated fiscal year.

(3) Qualitative Information Related to Consolidated Earnings Forecasts

During the cumulative consolidated third quarter, the global spread of COVID-19 continued to have a serious impact on the economy. However, China resumed economic activities early on and continues to recover, experiencing firm performance in the electronics, electrical, and automobile businesses. During the consolidated third quarter, Japan and ASEAN also experienced better-than-projected recoveries and lower costs associated with voluntary restraints on activities in response to COVID-19. Overall, our performance has recovered to a greater degree than we projected at the beginning of the consolidated fiscal year. We recorded a gain on sale in connection with the transfer of subsidiary shares and the sale of cross-shareholdings. We entered these stock transactions from the perspective of the best owner of such shares, as part of the priority policy of Portfolio Optimization described in our *ACE-2020* mid-term management plan. As a result of these factors, performance in every profit measure as of the end of the third quarter of the fiscal year ending March 31, 2021, exceeded the full-year consolidated forecast we announced on May 14, 2020.

While the business environment surrounding the NAGASE Group remains uncertain, we expect a certain level of profits for the fourth quarter. Therefore, we have decided to make an upward revision to our full-year earnings forecasts as indicated below.

For these forecasts, we changed our assumed foreign exchange rates from \\$106 to \\$105 to the U.S. dollar and from \\$14.7 to \\$15.5 to the RMB.

a. Revision to full-year earnings forecast (April 1, 2020 - March 31, 2021)

(Assumption for Going Concern)

No matters to report.

(Significant Fluctuations in Shareholders' Equity)

No matters to report.

(Additional Information)

(Application of Tax Effect Accounting for Transition from Consolidated Taxation System to Group Tax Sharing System)

The Company and certain domestic consolidated subsidiaries have calculated the amounts of deferred tax assets and deferred tax liabilities in accordance with the provisions of tax laws in Japan prior to the amendments based on the treatments stipulated in Paragraph 3 of Practical Solution on the Treatment of Tax Effect Accounting for the Transition from the Consolidated Taxation System to the Group Tax Sharing System (Accounting Standards Board of Japan (ASBJ) Practical Issues Task Force No. 39, March 31, 2020) instead of applying the provision of Paragraph 44 of Implementation Guidance on Tax Effect Accounting (ASBJ) Guidance No. 28, February 16, 2018), regarding the transition to group tax sharing system provided for in Act for Partial Amendment of the Income Tax Act, etc. (Act No. 8 of 2020), and items for which the non-consolidated taxation system has been reviewed in line with the transition to the group tax sharing system.

(Effects of COVID-19 Pandemic When Making Accounting Estimates)

The Group made accounting estimates related to impairment loss on non-current assets and recoverability of deferred tax assets, etc., based on information available at the time the consolidated financial statements were prepared.

The impact of the spread of COVID-19 on the Group's earnings during the cumulative consolidated third quarter has been limited overall. The most prominent impact was on the first quarter results of the automobile-related business. However, since the second quarter, China has maintained an economic recovery after resuming economic activities quickly. In the third quarter, Japan and ASEAN experienced better-than-expected recoveries. However, we still cannot foresee when a cessation of the spread of COVID-19 will occur. Given the expected decrease in automobile production due to a shortage in the supply of semiconductors, we project that the spread of COVID-19 will once again have a considerable impact on NAGASE Group earnings during the consolidated fourth quarter.

In light of the preceding, the Group's accounting process is based on the assumption that the impact of COVID-19 will result in a continued unstable business environment from the consolidated fourth quarter of fiscal 2020 through the end of fiscal 2021, as has been the case with fiscal 2020.

Many uncertain factors regarding the impact of COVID-19 remain, which may affect the financial condition and operating performance of the Group in the consolidated fourth quarter and thereafter.

- (Note) 1. "Others" is a business segment consisting of businesses not included in Reportable Segments, and includes logistics services, information processing services, and professional services.
 - 2. Corporate segment income (loss) represents expenses not allocated to Reportable Segments or Others.
 - 3. Adjustments are eliminations of intersegment transactions.
 - 4. The sum of segment income (loss) Total, Corporate, and Adjustments is equivalent to operating income as presented in "Consolidated".
 - 2. Information about assets for each reportable segment (Significant increases in assets due to acquisition of subsidiaries)

During the consolidated second quarter, the Company acquired equity in Prinova Group, LLC, adding a total of 18 companies including Prinova Group, LLC and its subsidiaries to the scope of consolidation. In connection with this transaction, assets of the Life & Healthcare segment increased ¥73,000 million compared to the end of the prior consolidated fiscal year.

3. Information about impairment loss of non-current assets or goodwill, etc. for each reportable segment (Significant impairment losses of non-current assets)

In the Electronics segment, as a result of worsening profitability of the thin processing business for glass substrate, the carrying amounts of the related business assets were reduced to their recoverable amounts. The recorded loss on impairment of fixed assets in this instance was \(\frac{\pmathbf{1}}{4}\),039 million in the cumulative consolidated third quarter.

(Significant changes in goodwill)

During the consolidated second quarter, the Company acquired equity in Prinova Group, LLC, adding a total of 18 companies including Prinova Group, LLC and its subsidiaries to the scope of consolidation. In connection with this transaction, the Company recorded goodwill within the Life & Healthcare segment. Following the finalization of the provisional accounting treatment, goodwill amounted to ¥10,747 million at the end of the consolidated fiscal year.

II Nine-month period ended December 31, 2020 (consolidated)
